

## **Trabuco Road Streetscape and MPAH Project** **(Currently Underway)**

The project is along Trabuco Road between Bake Parkway and Lake Forest Drive, and involves the design and construction of streetscape improvements to enhance traffic calming along this segment of the roadway. The improvements include pavement rehabilitation, traffic signal improvements, parkway landscape improvements, and raised landscaped medians. On the west side (cemetery side) of Trabuco Road, the improvements include storm drain modifications, street widening, a sidewalk, and

a bike lane. Construction on this project is currently underway with an anticipated completion of the improvements in August 2012. The City's contractor will be placing new asphalt in both directions of traffic on Trabuco Road between Bake Parkway and Lake Forest Drive during the week of July 9-13. There will be periodic lane closures where there will be one lane of traffic. The contractor will use various means to minimize impacts to the motorists, however, delays should be expected between the hours of 7:00 am and 5:00 pm. Motorists are advised to use alternate routes such as Serrano Road, Toledo Road, and Jeronimo Road during the construction period. The plant establishment period for this project will end November 2012.
